---

**Report Highlights:**

**Prices for U.S. grapefruits are up 15-20 percent, and despite concerns over avoiding excess inventory, sales are brisk and likely to reach 210,000 metric tons this year.**

**While exports of lemons are likely to remain unchanged, this year, exports of U.S. fresh oranges are likely go up by 7 - 8 percent, according to Tokyo's traders.**

## **The 2000/01 High Quality Crop of U.S. Grapefruit Made a Successful Marketing in Japan**

This season's U.S. grapefruit made a strong impression with Japanese traders, due largely to high quality and reasonable pricing, and is currently trading at prices 15 - 20 percent higher than last year at Japan's major wholesale market. The 2000/01 crop of Florida grapefruit had an excellent taste, well balanced Brix levels and acidity, and kept both Japanese traders and consumers happy.

Both white and ruby grapefruit are currently traded at Tokyo's Ohta Wholesale Market at 3,300 - 3,200 yen (\$26.82 - \$26.01) for a carton (17 kilograms) of sizes 27 and 32. Sizes 36 and 40 are traded at 3,100 - 2,700 yen (\$25.20 - \$21.95) and size 48 at around 2,400 yen (\$19.51). Retail prices are fairly stable reflecting stable supply and stable quality. Tokyo's major supermarket sells at around 100 yen (\$0.81) for a medium sized fruit, and 120 - 150 yen (\$0.97 - \$1.21) for a large sized fruit.

The Japanese imports of U.S. grapefruit is projected to reach 210,000 metric tons, with Florida alone likely to reach 170,000 metric tons (approximately 10 million cartons,) according to Japanese traders. However, this season Japanese importers have been extremely cautious on their purchasing volume in order to avoid excessive inventory, a problem last season. Demand for U.S. grapefruit is fairly strong this season due to high quality and fruits are moving smoothly in Japan's distribution channels. Japanese purchasing of grapefruit likely to shift from Florida sourced to California sourced towards mid-June.

The quality of domestic citrus products was good this season (the domestic citrus season completed in mid-March), however, the price for domestic citrus was relatively high and many Japanese retailers shifted to reasonably priced U.S. products early in the season.

## **Israeli Sweetie is Stabilized at Approximately One Million Cartons in the Japanese Market**

Israeli sweetie was rather quietly marketed this season from November through January, with the total disposition of approximately 15,800 metric tons (930,000 cartons). Israeli sweetie were popular for the newness and the rarity in Japanese market until a few years ago. However, many traders find it increasingly difficult to further penetrate the Japanese market.

Israeli sweeties were traded at around 2,500 yen (\$20.32) for a carton (17 kilogram) of sizes 32 and 36, and 2,100 yen (\$17.07) for size 40s in January, 2001. Retail prices are similar to the prices of U.S. grapefruits and Tokyo's major super market sold at 100 - 150 yen (\$0.81 - \$1.21) for a large sized fruit and 78 - 130 yen (\$0.63 - \$1.05) for a medium sized fruit.

## **Japanese Fresh Orange Imports Projected to Reach 140,000 Tons in 00/01**

The good taste of U.S. fresh oranges has supported strong sales this season; sales are likely go up by 7 - 8 percent, according to Tokyo's traders. The movement of U.S. fresh oranges is fairly stable in Japan's distribution channels due to the stable supply from the United States. Sales of California Navels, which had a good quality with high Brix levels, were good this season. With the Navels market finishing in late April, sales are now switching to Valencias. Japanese sales of fresh oranges have been fairly strong since early April, as

Japanese temperatures started to climb. Strong sales are expected to continue with Valencias, although traders are cautious about import volume in order to avoid excessive stocks.

Currently, California Valencias are traded at Tokyo's Ohta Wholesale Market at around 3,000 yen (\$24.39) for a carton (17 kilograms) of sizes, 56, 72 and 88, and around 2,500 yen (\$20.32) for size 113s. Navels were also traded at similar prices in April. California Valencias are presently sold at 88 - 100 yen (\$0.71 - \$0.81) for a bag of 6 medium sized fruit.

### **Imports of Spanish Orange Expected to Decline Marginally**

The supply of Spanish oranges is expected to decline this season due to poor weathers in the growing regions in Spain, according to Japanese traders. Spanish oranges are fairly popular among Japanese traders as a sweet taste orange and are often sold as gifts at premium prices. Spanish Navels were sold until late April this season, with sales switching to Valencias in early May. Currently, Spanish Valencias are traded at Tokyo's Ohta Fresh Produce Market at 3,300 yen (\$26.82) for a carton (14 kilograms) of sizes, 50, 56, 66 and 78. Navels were also traded at a similar price this season.

### **Japanese Fresh Lemon Market Keeps Steady**

California continues to supply remains fairly smooth with good quality lemon, this season. Currently there are 140,000 cartons ( 2,380 MT) of on-hand stocks in the nation's cold storage warehouses. Japanese importers are closely monitoring stocks and are expected to be careful about import volume this season. Japanese import of lemons this season is expected to be unchanged or slightly less than last year, as an adjustment to last years oversupply, according to traders at Tokyo's Ohta Wholesale Market.

Currently, Japanese lemon market is stable and wholesale prices are relatively strong, due largely to good quality fruit. California lemons are traded at Ohta Market at around 4,000 yen (\$32.52) for a carton (17 kilograms) of size 95, 115, 140 and 165. Tokyo supermarket retails fresh lemons at 90 - 100 yen (\$0.73 - \$0.81) for a medium sized fruit, and at 180 - 200 yen (\$1.46 - \$1.62) for a plastic bag of 3 lemons.

### **Japanese Citrus Beverage Market Continues to Recover**

Japanese fruit beverage production in CY 2000 was 2.25 million liters, up 2 percent from the previous year. Japan's largest consumption of fruit beverage by type is a soft drink with some content of natural fruit juice, followed by a 100 percent natural fruit juice product. The products that contain 10 - 30 percent natural fruit juice showed a 135 percent increase in production in CY 2000 over CY 1999, and continue to grow strongly this season. The trend in Japan's fruit beverage market is for Japanese beverage manufactures to continue to market new soft drink products containing 10 - 30 percent natural fruit juice this season. Kirin Tropicana and Minute Maid, Japan's leading fruit juice manufacturers, will launch big sales promotions for 100 percent natural orange juice this season. Japanese traders hope for a good market recovery for 100 percent fruit juice products.
